Om produsenten

Multi Radiance Medical's Super Pulsed Laser Technology is in the safest classification of lasers and its efficacy has been validated in vitro, in vivo, in controlled laboratory experiments and in clinical practice. A Scientific Monograph, written in conjunction with Laser Therapy University entitled The Pillars Paper, has been recently published and confirms this to be not only statistically significant, but clinically significant technology. It also raises the bar in the industry from evidence-based research to translational research.

Multi Radiance Medical is also currently involved with over 30 Clinical Studies Worldwide. It is our mission to investigate, validate and educate our practitioners with the knowledge and clinical skills necessary to achieve the best possible outcomes. Join hundreds of professionals each month and thousands per year who choose Multi Radiance because our Super Pulsed Lasers are safe for both customer and clients and cost thousands less than Class IV Lasers (surgical and rebranded "therapeutic").

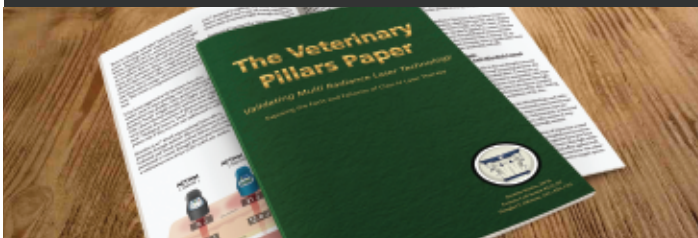

MULTI RADIANCE LOCATIONS SERVING OVER 30 COUNTRIES WORLDWIDE

Safety, Global Experience and Support

- 400,000 units installed in 30+ countries
- 20 years clinical track record
- Used in 15,000+ private practices
- Highest degree of safety available
- Allows delegation of treatment to staff without potential of thermal hazard
- Marketing and Educational Support
- Makes clinical time more efficient and productive
- Standard 2 year warranty with optional additional 3 years
- Ask us about safely renting out Rent My Pet Laser to your clients for treatments at home.
- ROI

THE VETERINARY PILLARS PAPER

The Veterinary Pillars Paper is the third in a series of Pillars Papers, and explores the science of light-based therapies through the available peer-reviewed evidence and dispels confusion surrounding light therapy including the Facts and Fallacies of Class IV Laser. Additionally, a glimpse of the clinical utility of Photobiomodulation is discussed for Veterinarians and owners to better understand the potential value of Multi Radiance therapeutic lasers.

REVELATIONS: COMPENDIUM OF RESEARCH

This book presents a collection of summaries of scientific papers on safety and effectiveness of Multi Radiance Medical's Super Pulsed Laser Therapy in different fields of application. There are 22 peer reviewed papers and 17 more in the queue that report the outcomes of research coordinated by MRM Research Division and carried out in numerous clinical and research centers, both public and private.

Exclusive Multi Radiance Technology Innovations

When it comes to laser treatment, **Less is More**. Multi Radiance Super Pulsed Lasers have outperformed Class IV lasers in head to head clinical studies.

The sophisticated software algorithm coordinates the interaction between laser, LED's and magnetic field to achieve the desired depth of penetration time profile (DPTP).

The core technology in MR4 Super Pulsed Lasers provides the highest photon delivery with lowest thermal impact to tissue, thereby creating the safest thermal time profile (TTP).

LaserSweep™

The constant use of the same frequency, as found in duty cycle lasers, can cause the body's tissue to adapt to the laser's effects, thus limiting its effectiveness. The MR4's LaserSweep varies its frequency to prevent the tissue from adapting.

Patented technology changes frequencies (number of laser pulses emitted per second) to "scan" target tissue from superficial to deep, increasing its effectiveness. The treatment presets are based on clinical experience and research.

The Cascade Energy Effect™ Triple Synchronized Wavelengths

Sophisticated software algorithm synergizes multiple wavelengths, creating cascading effect: 660 nm absorbed by superficial tissue clears the way for infrared 860 nm to penetrate deeper which allows infrared 905 nm super pulsed laser to go even deeper into tissue.

Multi Radiance Medical's proprietary multi-source technology successfully manipulates the interaction between light, laser and frequencies to achieve the desired penetration in the targeted tissue areas.

Super Pulsed Laser (905nm)

The Super Pulsed Laser (905nm) produces high powered light in billionth-of-a-second pulses. The power of each pulse drives the photons, or light energy deep into the target tissue. Multi Radiance Medical technology's power of up to 50,000mW creates a high photon density, reducing pain and improving micro-circulation.

Pulsed Broadband Infrared SLDs (860nm)

The infrared 860 nm non-coherent light penetrates into deep tissue to provide photo physical changes to the target tissues that improve local blood circulation to promote muscle relaxation and pain relief.

Pulsed Red Light (660nm)

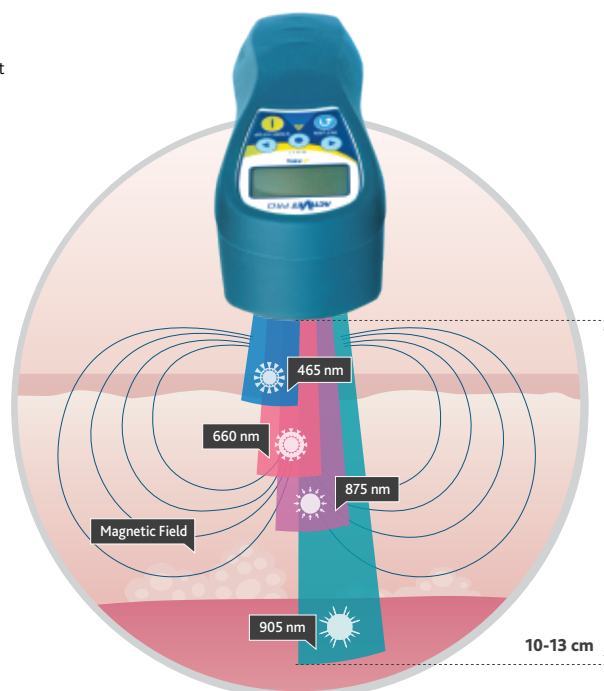

660 nm red light penetrates relatively shallow but exerts a strong influence on acute injuries, reducing pain quickly.

Pulsed Blue Light (465nm)

465 nm blue light penetrates poorly but is especially effective in treating MRSA, inflammatory skin conditions and other bacteria and viruses.

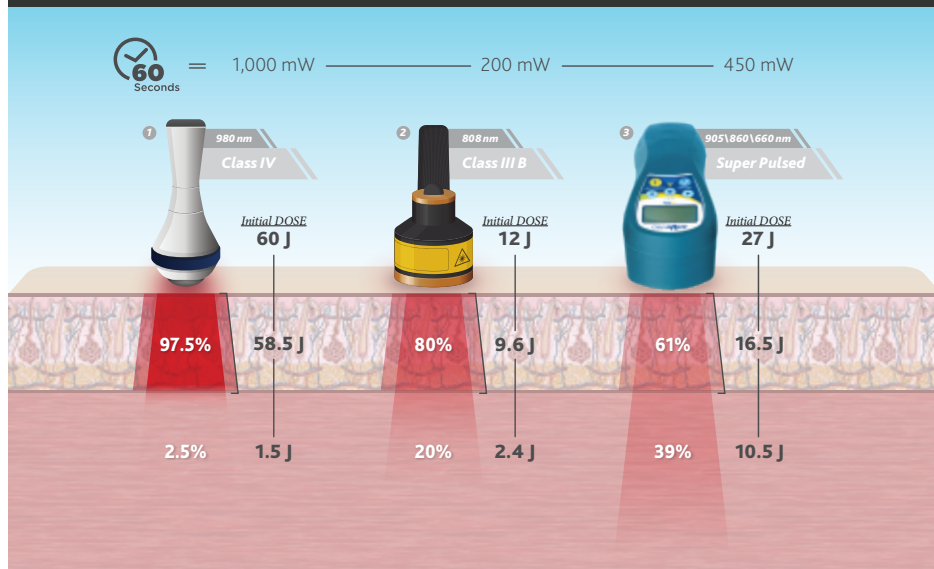

Static Magnetic Field (SMF)

Static magnetic field keeps ionized molecules of tissue in a dissociated state, enhancing the tissue's potential to absorb the energy.

When multiple wavelengths are combined, there is a 100% increase in the available light below the skin and confirms the presence of synchronicity between wavelengths called the Triple Cascade Effect (Validated in the

LESS IS MORE: Wavelength, NOT power, determines depth of penetration

ACTIVET PRO LaserShower

The ACTIVet PRO LaserShower is a cordless, portable laser therapy system offering surface area coverage greater than 4x that of standard emitters. With 200 W of peak Super Pulsed Laser power, it provides faster treatment times for large companion animals and Equine with its expanded aperture coverage. With over 500 mW of Average Power, and 250 mW of Blue Light power, our technology safely delivers the most light to tissue and facilitates absorption.

FEATURES

200W of Peak Super Pulsed Power
Pulsing Red, Infrared and Blue Radiances
Multiple Treatment Modes
Cordless, 6 Hour rechargeable battery
Treat more than 4x the area of standard emitters

MR4 ACTIVET

The ACTIVet Cordless Super Pulsed Laser provides treatment options and safety not possible with Class IV lasers that produce thermal side effects. Through years of research, Multi Radiance has developed the Gold Standard in Laser Technology. The POWER to treat even deep conditions, the SAFETY to use anywhere! It comes with a protective travel silicone sleeve and set of Acupuncture/Trigger Point Probes.

FEATURES

25,000mW of Peak Super Pulsed Power
Pulsing Red, Infrared and Blue Radiances
Multiple Treatment Modes (6)
Cordless, 6 Hour rechargeable battery
Probes: Laser Puncture / Trigger Points

My Pet Laser 2.0

Reduce pet stress. Veterinarians just like you are now renting our safe and highly effective lasers to their clients and generating thousands every month in passive income. The My Pet Laser 2.0 features 25,000mW of Peak Super Pulsed Power and has 5 standard settings designed to treat common conditions.

FEATURES

25,000mW of Peak Super Pulsed Power
Pulsing Red and Infrared Radiances
Multiple Treatment Modes (5)
Cordless, 8 Hour rechargeable battery

ACTIVETTM PRO

50 W OF SUPER PULSED LASER POWER

300% MORE TOTAL POWER THAN THE ACTIVET

900% MORE BLUE LIGHT

Introducing the NEW ACTIVet PRO with 300% More Total Power: providing more light to the target tissue without raising skin temperature.

- Multi Radiance Medical (MRM) completed the industry's first Proof of Concept (POC) on the MR4 ACTIVet in the Pillars Paper
- The POC confirmed that a synergistic effect exists between the different light sources (laser and LEDs) and was able to measure the amount of light entering the body (depth of penetration time profile or DPTP) and calculate the amount of heat generated on the skin surface (thermal time profile or TTP).

VALIDATED

- The ACTIVet PRO is the first device created with the recently identified optimal parameters from the many studies performed in the POC.
- The ACTIVet PRO provides a 300% increase in power which can shorten treatment times and provide powerful pain relief. Unlike High Powered Lasers, the increase in power of the ACTIVet PRO does not elevate the skin temperature making it the SAFEST HIGH POWERED LASER on the market.
- The ACTIVet PRO now includes 3 ultra-bright high powered 465 nm blue LEDs, a 900% increase in both power and density of the blue light. This offers an entirely new approach to managing wounds by not only accelerating wound repair but also reducing bacterial burdens of infected wounds.

OPTIMIZED

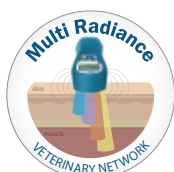

SUPERIOR

- Pain Relief
- Inflammation/Edema
- Infection/Wound Care
- Performance + Recovery

DIFFERENTIATED

- Laser Puncture
- Blue Light
- Cordless
- Highest Power / Lowest Thermal Profile

Compare our ROI to any other modality!

Just one client rental / month creates substantial revenue!

With today's rising expenses and lost revenue to the Internet, it's a challenge to grow your practice net income. Let Multi Radiance prove how Laser rentals multiply quickly!

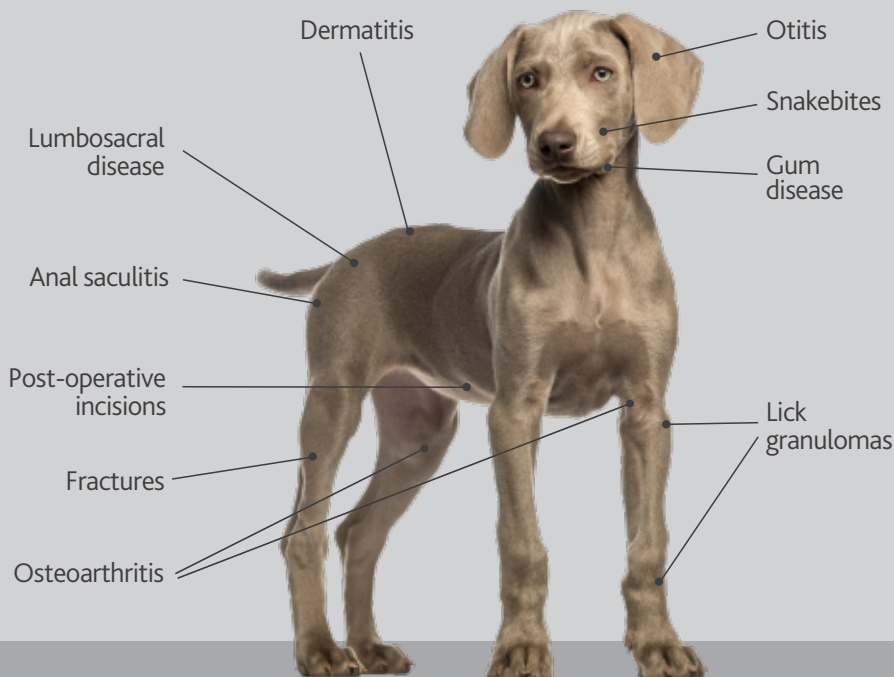

Your clients have been hearing about Laser's beneficial wound and rehab effects for years, but we are the only company offering you Class 1 safe and effective rentals for your clients.

Multi Radiance is committed to veterinarians

- ACTIVet PRO Laser System - Perfect for your practice.
- MyPetLaser units - for companion client rentals.
- ACTIVet units - for equine client rentals.
- Each product comes with treatment protocol manuals.
- Tech support for you and your techs.

TREAT HUNDREDS OF CONDITIONS

Veterinarians have successfully treated hundreds of conditions using our Multi Radiance Super Pulsed Lasers. Here are just a few of the conditions that many have reported positive treatment results using our laser:

Some conditions will improve with one or two treatments, such as post-surgery, and acute pain. Some conditions may require a series of visits over a few weeks. Examples: lick granulomas and otitis.

"We're very impressed with the MR4 ACTIVet laser for equine physiotherapy."

Kent Allen, DVM

Owner, Virginia Equine Imaging, ISELP Certified, Co-Founder,
Director Vet Services, WEG 2010

"We have used the MR4 ACTIVet Laser in a 3 day-per-week protocol for our top endurance horses to keep them supple and comfortable while in a rigorous training program. It is easy to use and I recommend it all the time."

Meg Sleeper, VMD

DACVIM, Endurance Team '12 London '14 WEG, Section of Cardiology
Department of Clinical Studies University of Pennsylvania

"We picked this Laser for several reasons. First, it's Super Pulsed with multiple synergistic wavelengths and frequencies. Next, its Class 1M allows us to be extremely safe with our patients. I highly recommend this company."

Albert Nunez, DVM,

Animal Hospital at Baldwin Park

"We have used the MR4 ACTIVet with success on many soft tissue conditions in sport horses. It is easy-to-use for clients and well tolerated by the horses."

Duncan Peters, DVM

Diplomate ACVSMR Therapy Director World Equestrian Games

"The MR4 ACTIVet is a great way to help manage common injuries in equine athletes. It is user-friendly, safe and effective. I recommend it highly to my clients."

Mark Revenaugh, DVM

Northwest Performance Equine, USEF, Head
Vet, U.S. Eventing Team

"Multi Radiance Medical adds a safe effective new therapy for my patients. I use it for a wide range of conditions, especially arthritis."

Stacey Huber, DVM

Owner, Oasis Animal Hospital

"The promise of Laser therapy is fulfilled by Multi Radiance. It's so safe, my clients can use it in the relaxed comfort of their home. Multi Radiance has earned my endorsement!"

Allen M. Schoen, DVM

Author, 'The Compassionate Equestrian'

"I have used it on painful anal glands with success, and have added it to my protocol after acupuncture for disc problems and have seen faster pain relief."

Deb Brown, DVM

Pequot Lakes Animal Hospital
